In reference to the agency's Report of Investigation, the only comment I wish to provide is in regard to the conclusion of the report:

ABASS requirements (ensuring TSA Leased Spaces are ADA compliant) should be eliminated in rural areas or at least made to be significantly more easy to obtain a waiver given the extreme lack of other viable resources or locations. Multiple TSA leased spaces in Alaska already occupy spaces that are not ABASS compliant; ergo, the agency has a double standard here.
