

COMMENTS ON AGENCY REPORT
OSC FILE NO., DI-12-4027

I am happy that measures have been taking in order to correct all deficiencies in CLC2, Although many of the employees have denied some of the events, you did find the higher residents falls statistics, and the high rate of dehydration in the residents along with many other things.

In the report said that you ask the whole personnel about the incident with the residents that fell from their beds, and everybody said it was not true. You have to understand that I didn't mean she told that to the whole personnel but only to the employees who were there that day, She said, and I quote: "Every time a patient fell from their beds put him back in and say nothing about it, because I will get in trouble and I don't want to fill out so much paperwork."

Also you didn't mention the last incident, that happened a weeks before my job was terminated, where me and Yaritza had to bath all the residents from 12 mid to 8:00 am, That was when we sent one of the residents to the ER because he was cold/trembling from lying in sheets soaked with urine. Carmen Felix, the nurse leader at that moment, saw everything.
