

Please allow this e-mail to serve as my comments to the above documents.

First off, the only wrong doing that has been addressed to Heather Garneau is a violation of ethics. For seven years, her and her dad Dennis Garneau had supplied Earth Creations with stock provided with VA funds. I find this very disturbing that four years after the fact, she is demoted from a GS-12 to a GS 11-1. This is totally unacceptable.

The main reason that I had contacted OSC initially is that supplies needed to maintain the facility where not being purchased. Yet the only items being purchased on a continual basis was for landscaping material that did not come to this facility. Not only did it not come to this facility, they were not needed.

The \$ amount that has been saved since Dennis and Heather have been stopped is over 1 million dollars. Yet she gets hit with an ethics violation. The outcome of this four year investigation is absurd.

Sincerely,

Kevin Cornellier
