

OSC # DI-11-0747

I agreed with the follow-up report provided by the FAA. I know they are trying to negotiate radar sharing with MDSD and TNCM. The sharing of radar data will enhance our ability to separate traffic and improve operational requirement between Foreign Facilities.

My concern is that Miami Center ZMA has a shout line between them and MDSD for a quite long time and we were not placed (ZSU) in consideration at the time this shout line was installed.

Hopefully we will see it soon.

Sincerely,

Edgar Diaz
